WORK EXPERIENCE

ZYNGA | SOFTWARE ENGINEER

AUG - DEC 2016 | TORONTO, ON

- Part of the Games with Friends team and worked closely with client teams in developing new features for Zynga's top mobile games.
- Implemented using Ruby on Rails, new Spin Rewards, XP grant system for Word Streak and Auto Email Notification jobs for Words with Friends.
- Winner of Zynga's 2016 Q4 iMessage hackathon with the project named Beep Boop, which is set to release in 2017.

POINTCLICKCARE | FRONT END UI DEVELOPER

JAN - APR 2016 | MISSISSAUGA, ON

- Worked closely with business stakeholders and customers to perform an in-depth analysis of web app design in order to enhance user experience.
- Collaborated with the design team to create an UI guidelines detailing different design components, when and where to use them, along with best practices and examples.

KLICK HEALTH | WEB DEVELOPER

MAY - AUG 2015 | TORONTO, ON

- Built a web app, using ReactJS and FireBase, to process badge and building security system data to track employee location in real-time along with allowing the creation of alarms to notify users when an employee they are looking for enters the building.
- Worked directly with medical professionals, to analyze their needs and develop a web app aimed at solving their issues.

HANSA LANGUAGE CENTRE | SOFTWARE DEVELOPER

AUG - DEC 2014 | TORONTO, ON

- Developed reporting tools, payments and registration systems using Django.
- Worked with administrators from across the company for a redesign of the full company website including making the UI more intuitive and accessible.

PROJECTS

BEEP BOOP

OCT - DEC 2016

- Winner of Zynga 2016 Q4 iMessage hackathon.
- Beep Boop is a co-operative memory game, the objective is to memorize a sequence of flashing tiles and try to replay them correctly with a friend. The further you get, the faster the tiles flash and longer the sequence.
- Beep Boop is set to release on Zynga's iMessage GameHub in 2017.

LOSOCOCCO | <http://devpost.com/software/losocco>

SEPT 2015

- Created an aggregator of local sellers to allow users to save on shipping costs, using Meteor.JS.
- Using IndicoAPI to perform sentiment analysis on seller reviews to create vendor ratings to ensure integrity of all vendors.

SEARCHDIT | <http://searchdit.com>

AUG - SEPT 2015

- A web app with a minimalistic interface that makes reddit easier to browse and function like a search engine.
- Built with ReactJS and Reddit API.

KID SOUL BEATS | <http://kidsoulbeats.com>

AUG 2012 - PRESENT

- Self made music production brand with over 190K listens on SoundCloud and over 160K views on YouTube.
